LISTA

Intercollegiate Basic Surgical Skills (BSS) Course

This two and half day course has been designed to introduce surgical trainees to safe surgical practice within a controlled workshop environment and it aims to 'teach, assess and certify' the ability of trainees to use safe and sound surgical techniques that are common to all forms of surgery.

Level - ST1

BSS should be undertaken during the first year of Specialty training (ST1) although it is permissible that trainees in foundation years may take part as long as their involvement does not preclude ST1 trainees from attending.

Content

The course consists of three main areas:

- Open surgery
- Wound management
- Endoscopic surgery

Format

- Hands-on practice
- Individual tuition
- Assessment with personal feedback

Key benefits

The Basic Surgical Skills (BSS) course is designed for doctors who began their basic surgical training on or after 1 August 1996 and are preparing for the MRCS examination and course. Completion of an approved BSS Course is a mandatory requirement for trainees pursuing a career in Surgery.

What you get

- Course handbook and Course DVD

Duration - 2.5 days
