

METABOLIC / BARIATRIC SURGERY FOR THEATRE AND NURSING TEAMS

This course is intended to provide ward and theatre practitioners with a comprehensive overview of metabolic/ bariatric surgery.

The programme will explore

- The components of a metabolic/bariatric service
- Operative techniques, pre, intra, post operative
- Anaesthetic Issues
- Patient Experience
- Long term follow up and care
- The Importance of support
- Nutritional information and support
- Current national and international guidelines on service provision.

The programme will include practical workshops on

- Instrumentation and equipment
- Moving and handling

As well as providing an overview of current issues and techniques the course aims to develop specific skills and knowledge in relation to patient care and safety.

Duration: 2 Days

Fee: £200.00
